TZU-HSIN YANG

https://www.linkedin.com/in/tzuhsinyang/ zixinyang92@gmail.com
https://github.com/ZixinYang https://zixinyang.github.io/

Research Interests

Bayesian Inference, Deep Probabilistic Models, Uncertainty Estimation in Deep Learning, Reinforcement Learning

Education

National Cheng Kung University, *Tainan, Taiwan* *Jul. 2018*

· Master of Science in Computer and Communication Engineering
- Overall GPA: 4.0/4.0

National Chiao Tung University, *Hsinchu, Taiwan* *Jun. 2016*

· Bachelor of Science in Electrical and Computer Engineering
- Last 60 GPA: 3.27/4.0

Work Experience

Research Assistant, *Academia Sinica, Taipei, Taiwan* *Sep. 2020 – Present*

· Planning to develop Insurance Fraud Detection System with network data

Data Scientist, *KKBOX Inc., Taipei, Taiwan* *Jun. 2019 – Aug. 2020*

· User Behavior Analysis
- Churn Analysis: discovered key factors of churn / developed boosting models to predict churn users
- Subscription Analysis: developed ***ARIMA*** models to predict future subsciption
- Modeled user journeys on app via semantic embeddings using ***fastText*** as a feature of users

· Music Personalized Recommendations
- Developed boosting methods for playlists recommendation
- Added features to prevent playlists from remaining the same
- Designed metrics of AB testing including average stream, retention and stream growth

· Public Opinion System
- Developed a crawler pipeline for regular update of articles using GitLab and Jenkins
- Implemented a NER system with Chinese NLP tools (***CkipTagger***)

Deep Learning Scientist and Bioinformatician, *Insilico Medicine Inc., Taipei, Taiwan* *Aug. 2018 – May. 2019*

· Molecules Generation: implemented conditional generative models for generation given properties
· MRI Brain Image Analysis: implemented ***Unet*** model to segment images

iOS Mobile App Developer, *National Cheng Kung University Library, Tainan, Taiwan* *Aug. 2017 – Jun. 2018*

· Developed a mobile library app including circulation services for twenty thousand students and faculty

Teaching Assistant, *Department of Electrical Engineering, NCKU, Tainan, Taiwan* *Sep. 2016 – Jun. 2017*

· Teaching assistant for CS101 (Introduction to Computers) (C++)
· Won Teaching Assistant Awards for both fall and spring semesters

Publications

(First author) DNA: General Deterministic Network Adaptive Framework for Multi-Round Multi-Party Influence Maximization, *accepted paper in IEEE DSAA* *Oct. 2018*

· Developed a ***MCTS***-based framework which adapts to network change in the long run
· Developed influence maximization algorithms from game theory perspectives

· Designed a network similarity estimation method for new data prediction

(Third author) LSTMEnsembler: A LSTM-based Ensemble Framework for Predicting the Success of Mediation Requests Using Case Properties and Textual Information, *submitted to ACM TWEB* *Sep. 2020*

· Conducted the first research on predicting the success of real-world mediation cases
· Developed a ***LSTM***-based framework based on the case information and textual descriptions
· Implemented a system for public servants and the public to evaluate whether entering into mediation process and recommend the most appropriate mediator

Projects

(Kaggle) COVID19 Global Forecasting , *held by The White House OSTP* *Mar. 2020*

· Forecasted confirmed cases and fatalities between March 25 and April 22 by region
  - Developed a vector autoregressive moving average model (VARIMA) to predict regional values
  - Ranked in top 13% in the competition

(Kaggle) MolHack: Apply deep learning to speedup drug validation , *held by Insilico Medicine Inc.* *May. 2018*

· Predicted the stability of the complex given ligand-pharmacophore pairs
  - Developed a regressor based on deep neural network on well-preprocessed data
  - Won 2^{nd} place in the competition

(Course Project) Energy Consumption Analysis and Prediction for Household Planning, *NCKU* *Jan. 2017*

· Designed an algorithm to predict a household electricity consumption
  - Selected important features with random forest and predicted with linear regression models

(Course Project) Mining Geo-Social Services for Optimal Location Placement, *NCKU* *Nov. 2016*

· Designed an algorithm to rank top locations for hotels and theaters placement
  - Used hill climbing optimization algorithm with ***NDCG*** ranking score

(Course Project) Social Relationship inference from Urban Footprint , *NCKU* *Oct. 2016*

· Designed an algorithm to predict whether people are friends on social media with users' check-in data
  - Selected important features and used cosine similarity to measure the similarity between pairs

Skills

Programming Languages

· Python, C++, R, Scala, SQL, HTML, CSS, JavaScript, Matlab, Swift, MongoDB

Certificate

· **TOEFL iBT Scores:** 107 (R29, L27, S23, W28)
· **Microsoft Certified:** Azure Fundamentals

Relevant Coursework

· **University courses:** Linear Algebra, Differential Equation, Probability, Intelligent Data Analysis, Internet of Things and Urban Computing, Multilingual and Crosslingual Information System, Data Mining and Social Network Analysis
· **Online courses:** ML, DS and DL with Python (Udemy), Bayesian Inference (Coursera)
