

# TZU-HSIN YANG

 <https://www.linkedin.com/in/tzuhsinyang/>

 <https://github.com/ZixinYang>

 [zixinyang92@gmail.com](mailto:zixinyang92@gmail.com)

 <https://zixinyang.github.io/>

## Research Interests

---

Bayesian Inference, Deep Probabilistic Models, Uncertainty Estimation, Network Science, Reinforcement Learning

## Education

---

**National Cheng Kung University, Tainan, Taiwan**

Jul. 2018

- Master of Science in Computer and Communication Engineering
- Overall GPA: 4.0/4.0

**National Chiao Tung University, Hsinchu, Taiwan**

Jun. 2016

- Bachelor of Science in Electrical and Computer Engineering
- Last 60 GPA: 3.27/4.0

## Work Experience

---

**Research Assistant, Academia Sinica, Taipei, Taiwan**

Oct. 2020 – Present

- Developing Insurance Fraud Detection System based on *GNN* model
- Developing graph visualization system

**Data Scientist, KKBOX Inc., Taipei, Taiwan**

Jun. 2019 – Aug. 2020

- User Behavior Analysis
  - Developed *XGBoost* and *LightGBM* to predict churn users
  - Discovered key factors of churn behavior with *SHAP*
  - Developed *ARIMA* models to predict number of transactions
  - Modeled user journeys on app as a feature of users via semantic embedding with *fastText*
  - Built *Redash* dashboards to develop insights and make data-driven decisions with *PrestoSQL*
- Music Personalized Recommendations
  - Developed Spark ML Pipelines for playlists recommendation
  - Diversified playlists to increase user retention by excluding the streams caused by recommendations
  - Designed metrics of AB testing including average stream, retention and stream growth
- Public Opinion System
  - Developed a crawler pipeline for regular update of articles using GitLab and Jenkins
  - Implemented a NER system with Chinese NLP tools (*CkipTagger*)

**Deep Learning Scientist and Bioinformatician, Insilico Medicine Inc., Taipei, Taiwan**

Aug. 2018 – May. 2019

- Molecules Generation: implemented conditional generative models for generation given properties
- MRI Brain Image Analysis: implemented *Unet* model to segment images

**iOS Mobile App Developer, National Cheng Kung University Library, Tainan, Taiwan**

Aug. 2017 – Jun. 2018

- Developed a mobile library app including circulation services for twenty thousand students and faculty

**Teaching Assistant, Department of Electrical Engineering, NCKU, Tainan, Taiwan**

Sep. 2016 – Jun. 2017

- Teaching assistant for CS101 (Introduction to Computers) (C++)
- Won Teaching Assistant Awards for both fall and spring semesters

## Publications

---

(First author) **DNA: General Deterministic Network Adaptive Framework for Multi-Round Multi-Party Influence Maximization**, accepted paper in *IEEE International Conference on Data Science and Advanced Analytics* (acceptance rate: 20%)

Oct. 2018

- Developed a *MCTS*-based framework which adapts to network change in the long run
- Developed influence maximization algorithms from game theory perspectives
- Designed a network similarity estimation method for new data prediction

**(Third author) LSTMEnsembler: A LSTM-based Ensemble Framework for Predicting the Success of Mediation Requests Using Case Properties and Textual Information**, *submitted to ACM Digital Government: Research and Practice* Oct. 2020

- Conducted the first research on predicting the success of real-world mediation cases
- Developed a *LSTM*-based framework based on the case information and textual descriptions
- Implemented a system for public servants and the public to decide whether to enter mediation process

## Projects

---

<b>(Kaggle) COVID19 Global Forecasting</b> , <i>held by The White House OSTP</i>	<i>Mar. 2020</i>
<ul style="list-style-type: none"> <li>· Forecasted confirmed cases and fatalities between March 25 and April 22 by region               <ul style="list-style-type: none"> <li>- Developed a vector autoregressive moving average model (<i>VARIMA</i>) to predict regional values</li> <li>- Ranked in top 13% in the competition</li> </ul> </li> </ul>	
<b>(Kaggle) MolHack: Apply deep learning to speedup drug validation</b> , <i>held by Insilico Medicine Inc.</i>	<i>May. 2018</i>
<ul style="list-style-type: none"> <li>· Predicted the stability of the complex given ligand-pharmacophore pairs               <ul style="list-style-type: none"> <li>- Developed a regressor based on deep neural network on well-preprocessed data</li> <li>- Won 2<sup>nd</sup> place in the competition</li> </ul> </li> </ul>	
<b>(Course Project) Energy Consumption Analysis and Prediction for Household Planning</b> , <i>NCKU</i>	<i>Jan. 2017</i>
<ul style="list-style-type: none"> <li>· Designed an algorithm to predict a household electricity consumption               <ul style="list-style-type: none"> <li>- Selected important features with random forest and predicted with linear regression models</li> </ul> </li> </ul>	
<b>(Course Project) Mining Geo-Social Services for Optimal Location Placement</b> , <i>NCKU</i>	<i>Nov. 2016</i>
<ul style="list-style-type: none"> <li>· Designed an algorithm to rank top locations for hotels and theaters placement               <ul style="list-style-type: none"> <li>- Used hill climbing optimization algorithm with <i>NDCG</i> ranking score</li> </ul> </li> </ul>	
<b>(Course Project) Social Relationship inference from Urban Footprint</b> , <i>NCKU</i>	<i>Oct. 2016</i>
<ul style="list-style-type: none"> <li>· Designed an algorithm to predict whether people are friends on social media with users' check-in data               <ul style="list-style-type: none"> <li>- Selected important features and used cosine similarity to measure the similarity between pairs</li> </ul> </li> </ul>	

## Skills

### Programming Languages

- Python, C++, R, Scala, SQL, HTML, CSS, JavaScript, Matlab, Swift, MongoDB

### Certificate

- **TOEFL iBT Scores:** 107 (R29, L27, S23, W28)
- **Microsoft Certified:** Azure Fundamentals

### Relevant Coursework

- **University courses:** Linear Algebra, Differential Equation, Probability, Intelligent Data Analysis, Internet of Things and Urban Computing, Data Mining and Social Network Analysis
- **Online courses:** ML, DS and DL with Python (Udemy), Bayesian Inference (Coursera)
